

DOMESTIC CASESTUDY

Customer
Gerry Hagon

Products and Solution Provided:

18 x Sharp NT-175E1 175W Mono Modules

1 x Fronius IG30 Inverter

This installation was mounted onto the slate roof of Mr Gerald Hagon's home in the small country village of Alston, North East England. Mr Hagon's solar PV system will make a significant contribution to his annual electricity bill and he has often seen his electricity meter go backwards. Mr Hagon is also pleased that he is doing his part to save the planet and has encouraged his friends to look into Solar PV.

Mr Hagon will save on average of £127.55 a year from his energy bills and will earn in excess of £750.00 per annum through the up and coming UK feed in tariff scheme.

This installation will save 4,033.52 kg of CO2 per year and has encouraged Mr Hagon to become leaner in his use of electricity.
